

No of cores allotted to the server = 1

No of cores allotted to the load generated = 11

No of threads at server: 15

Size of request queue at server: 30000

Think time: 0.1 sec

Test duration: 60 seconds

Saturation at 2000 users:

Max Throughput (capacity) : 19600 req/sec

AvgRtt is increasing linearly after 2000 users and the throughput has become stagnant.

Throughput	AvgRtt	Users
4961.983398	0.000805	500
9900.283203	0.001035	1000
14773.500000	0.001576	1500
